+201148638928 | Cairo - Nasr City

Objective:

Data Analyst with hands-on experience in SQL, Python, Excel, Power BI, and Tableau, specializing in data analysis, dashboard development, and generating actionable business insights. Strong foundation in statistics, business concepts, KPI analysis, and data-driven decision-making, with practical experience translating data into strategic recommendations. Currently pursuing an MBA, bringing a blend of analytical, business, and problem-solving skills to support performance improvement and business growth.

Education:

- **Master of Business Administration (MBA)**
Arab Academy for Science & Technology (AAST) – Cairo
Expected Graduation: 2027
 - **Bachelor of Business Administration (BBA)**
Modern Academy - Cairo
Nov 2019 – Aug 2023
-

Courses:

- Advanced Professional Diploma in Data Analysis: 2026
 - Marketing Strategy Fundamentals – Mastery Academy: 2025
 - Banking and Financial Inclusion Diploma – Banker's Lounge Academy: 2022
 - ICDL & English for Banking – CBE Diploma: 2022
 - International Computer Drivers License: 2021
-

Projects:

Cottonil Sales & Business Performance Analysis | Power BI, DAX, Power Query, Excel

- Sales increased by 9.35% compared to the previous month, reaching EGP 2M.
- May recorded the highest sales level during the analyzed period.
- Men represented the largest customer segment, while Men's Boxers were the best-selling product category.
- Borel was the top-performing supplier, generating EGP 150K in sales with a 1.51% return rate.

Unaizah Association for Humanitarian Services | Power BI, DAX

- Built an interactive Power BI dashboard analyzing 5K+ beneficiaries and 20K+ services across multiple programs and service categories.
- Analyzed 4M in total donations and tracked an overall target achievement rate of 92.18%.
- Analyzed beneficiary demographics, including an average beneficiary age of 14 years, with 3.11K males and 1.89K females.
- Evaluated service performance using 84% attendance, 11% absence, and 5% excuse rates, with total service costs reaching 1.58M.
- Analyzed 6 programs to identify service distribution, beneficiary volume, and program performance.
- Developed interactive KPI dashboards to monitor beneficiaries, services, programs, donations, and performance trends.

Call Center Performance Analysis – Salla | Power BI, Power Query

- Built an interactive call center dashboard analyzing approximately 1.74M calls across February, March, and April.
- Monitored key service KPIs including 91.06% SLA, 98.68% Answer Rate, 1.32% Abandon Rate, and 9.22 ASA.

- Analyzed call volume trends by month, project, and agent to identify workload and service-performance patterns.
- Compared agent-level abandonment rates and identified variations in performance across **15+ agents**.
- Used interactive filters and KPI visualizations to support call center performance monitoring and decision-making.

Sales Performance Dashboard | Tableau

- Developed an interactive Tableau dashboard analyzing **2,823 orders** with total sales of **10.03M** and an average order value of **32.68K**.
- Analyzed sales performance across countries, products, customers, deal sizes, and monthly trends.
- Identified **Classic Cars** as the highest-performing product line, generating approximately **3.9M in sales**.
- Found that **Medium-sized deals contributed 61% of total sales**, highlighting the strongest deal-size segment.
- Analyzed monthly sales trends and identified significant changes in sales performance throughout the year.
- Built interactive KPI visualizations, calculated fields, and filters to support revenue and profitability analysis.

Misuo Sales Dashboard Analysis | Excel, Power Query

- Built an interactive sales dashboard analyzing **102 orders** with total sales of **1,199,386** and an average selling price of **11,861**. Built an interactive dashboard to analyze sales performance, customer types, and geographic distribution.
- Analyzed delivery performance and identified an **47.62% on-time delivery rate**.
- Analyzed sales performance across platforms, products, colors, regions, and customer types.
- Identified the highest-performing products, sales regions, and customer segments to support sales performance analysis.
- Cleaned and transformed the underlying sales data using **Excel and Power Query**.

Experience:

Data Analyst Intern — Mazen Analytics (Des 2025 — Jun 2026)

Worked on real-world datasets, dashboards, reporting, and business insights using modern analytics tools.

Data Analytics Projects (2025 — Present)

Built multiple business-focused dashboards and analytical projects focused on improving decision-making and performance tracking.

Technical skills:

Excel & Google Sheets: Advanced Formulas, Pivot Tables, Power Query, Power Pivot, Reporting, Dashboards

Google Forms: Data Collection and Survey Design

SQL: Joins, Subqueries, Aggregation, Data Extraction

Python: Pandas, NumPy, Web Scraping, Data Analysis

Power BI: DAX, Data Modeling, Interactive Dashboards

Tableau: Calculated Fields, Dashboards, Data Visualization

Looker Studio: Reporting and Dashboarding

Data Processing: ETL Processes (Extraction, Transformation, Load) and Load Automation

AI for Data Analysis: AI-assisted data analysis, Prompt Engineering, Insight Generation, Research Support, Workflow Automation
