

Project Overview

This project analyzed Misuo sales and operational performance to evaluate order behavior, delivery efficiency, platform performance, and customer purchasing patterns.

Tool used: Excel

Business Problem

The business needed insights into:

- Delivery performance
- Best-selling products
- Highest-performing sales platforms
- Regional sales performance
- Customer order distribution

KPIs

- Total Sales
- Total Orders
- Average Selling Price
- On-Time Delivery Rate
- Cancelled Orders
- Top Platforms
- Top Cities
- Product Performance

Key Insights

- On-time delivery rate was only 47%, indicating logistics inefficiencies
- Homzmart was the highest-performing sales platform
- Beds were the top-selling product category
- Cairo generated the highest sales volume
- Black color products achieved the highest sales
- Customer distribution:
 - Individuals: 90
 - Companies: 36
- 20 orders were cancelled

Recommendations

- Improve or replace shipping providers to increase delivery performance
- Focus marketing campaigns heavily on Cairo customers
- Increase inventory for bed products and black-colored items
- Prioritize product visibility and offers on Homzmart platform
- Analyze cancellation reasons to reduce lost orders

Business Impact

The analysis highlighted operational bottlenecks and customer trends, helping optimize logistics, inventory planning, and marketing strategy.
