

PROJECT OVERVIEW

This project analyzed customer spending behavior across age groups, purchasing channels, and countries to improve customer targeting and retention strategies.

21 January 2025

Total Spending and Customers by Country:

Spain	662k
Saud Arabia	211k
Kanada	169k
Australia	90k
India	69k
Germany	75k
USA	68k

Number Of Customers By Age Group:

46 - 60	950
Over 60	860
30 - 45	385

Business Problem

The company needed to understand:

- Which customer segments spend the most
- Which purchasing channels perform best
- Which countries generate the highest value
- How customer distribution affects revenue

KPIs

- Total Customer Spending
- Spending by Age Group
- Customer Distribution
- Sales Channels Performance
- Country Contribution

Key Insights

- Customers aged 60+ generated the highest spending at approximately 600K
- Age group 40–60 ranked second in total spending
- Online, catalog, and branch purchases showed different customer behaviors
- Customer distribution analysis helped connect customer volume with spending patterns
- Certain countries contributed significantly more revenue than others

Recommendations

- Prioritize campaigns targeting high-spending age groups
- Increase investment in the strongest-performing purchasing channels
- Develop retention programs for valuable customer segments
- Focus expansion strategies on high-value countries
- Personalize campaigns based on customer behavior patterns

Business Impact

The project improved understanding of customer behavior and supported smarter targeting, retention, and channel optimization strategies.
