

PROJECT OVERVIEW

This project focused on evaluating marketing campaign performance across multiple channels to optimize spending efficiency and improve return on investment.

BUSINESS PROBLEM

Tool used: Bower BI

The business needed to:

- Measure campaign efficiency
- Compare marketing channels
- Reduce acquisition costs
- Improve conversion performance

KEY INSIGHTS

- Performance varied significantly across marketing channels
- Some channels generated high clicks but low conversions
- Monthly performance tracking revealed seasonal fluctuations
- ROI analysis helped identify the most efficient campaigns
- Cost optimization opportunities were identified through CPA comparison

RECOMMENDATIONS

- Increase budget allocation toward high-performing channels
- Reduce spending on low-converting campaigns
- Continuously monitor monthly campaign trends
- Optimize targeting and campaign messaging
- Focus on channels with the highest ROI

BUSINESS IMPACT

The analysis improved visibility into campaign efficiency and supported data-driven marketing optimization decisions.
